

Communicate and conduct business with your clients on your personal mobile with a business number

Unplugged!

Not all businesses have an office and not all business happens in an office. If you are a remote worker or entrepreneur without the brick and mortar of traditional offices but have the need to communicate from anywhere, we have the right solution. Temovi Business Mobile provides you with the state of the art communications technology of an office phone without the additional cost.

Untethered communications for Businesses on the Go!

Eliminate the need for:

- ✓ An office or office phone
- ✓ Managing two mobile phones
- ✓ After hours answering service

Business Phone

- 2nd line for business to use on smartphone.
- Virtual business line on your smart phone.
- No VoIP calling, regular cellular calls, with business grade calling reliability.
- Smartphone shows incoming business calls with differentiated look and sound, auto-attendant choice and last note for immediate context.
- Business Phone App shows incoming/outgoing call activity.
- Outbound calls display Business Phone number.
- Post-call popup lets you capture notes for later review/reminders.
- Professionally answers business calls 24/7 via auto attendant.
- Configurable business hours and out-of-hours call handling.

Upgradable with SMB features:

- ✓ Share your Business Phone number with different phones
- ✓ Synchronised rich messaging conversations (every user sees customer messages and notes)
- ✓ Web Portal for easier access to all your Business Phone settings and features
- ✓ Visual Attendant to add your virtual receptionist to your website – Your customers can call you directly from their web browser

FEATURES

Virtual Receptionist

Emulate the appearance of a large business by leveraging the Virtual Receptionist to route calls or provide recorded instructions 24/7. (business hours, directions, web site, after-hour emergency contact).

Voice Mail / Unified Messaging

Never miss a call! Not only does your voicemail capture messages, but also access your voicemails via an App on your mobile phone.

Notes

Post Call Popup lets user capture notes for later review or set reminders. Your mini-CRM!

**One Business Number, One Mobile phone,
One Communications service that follows you wherever you go!**

Reasons to Use Business Mobile

Grow

- Be available to your customers/prospects no matter where you are – Don't miss a single opportunity
- Return calls in between jobs – no need to return to the office – everything is with you on your mobile app

Manage Costs

- Consolidate your phones to one mobile device
- Pay only for the features you need
- Upgrade as your business grows
- Pay by the month – no long-term contracts, no penalties, no physical infrastructure costs

Manage Time

- Manage your time with features that enable you to run your business while on the run!
- Return calls in between jobs – no need to return to the office – everything is with you on your mobile app
- Automatically filter out-of-hours calls during evenings, weekends and holidays

Reduce Risk

- Switch without a need to change devices
- Runs from the cloud, always available and runs on proven solutions that work on fixed, cellular and Wi-Fi networks

Why Business Phone?

- ✓ Access your business line from anywhere using your smart or mobile phone.
- ✓ Make outbound calls from your mobile phone without sharing your personal mobile phone number.
- ✓ Enjoy the professionalism of a Virtual Receptionist that can route calls or provide information to your customers.
- ✓ App easily downloadable from App stores.
