

GO FLEXIBLE WHEN YOU GO HYBRID

IPECS EMG80

Flexibility is the name of the game when you have a mixed IP and TDM environment. As business requirements change, both in capacity and features, iPECS eMG80 adapts and enriches business communication with advanced applications, embedded Unified Communications and mobility support with DECT and mobile clients.

ARE YOU FLEXIBLE?

Businesses are maintaining their old TDM desktop sets

IPECS eMG80

The iPECS eMG80 is a richly-featured hybrid IP/TDM communications platform for voice and mobility services, optimized for small and growing businesses. With its modular and flexible design, businesses can easily and affordably expand into premium UC and more sophisticated enterprise applications.

- **Full Featured:** Full PBX feature set including auto attendant, voicemail, call transfer, call forward, call park, call pickup, speed dial, station group, 3-party voice conference and more
- **Flexible:** Ability to use Digital (DKT) and Analog (SLT) phones along with the full selection of iPECS IP phones and DECT phones. A wide range of mobile applications and soft clients are also supported.
- **Secure:** Supports IPSec and sRTP security protocols
- **Affordable:** Low TCO with simple and straightforward licensing structure
- **Leading Technology:** Advanced IP networking with local and remote management through an intuitive HTML5-based GUI

iPECS eMG80 key features:

- Smartphone alerts for VM and email transcription
- One-time, perpetual license structure for a simple and cost-effective solution
- Sweet spot at 6-60 seats for small and growing businesses
- 32 VoIP and 48 DECT extensions
- TNET when Local Communications Manager to the UCP as Central Communications Manager
- More built-in features than other platforms in its class

iPECS applications available for the iPECS eMG80:

- iPECS Unified Communications Standard and Premium
- iPECS Contact Center Solution
- iPECS Report Plus
- iPECS IP Call Record (IPCR)
- iPECS Attendant / Hotel
- iPECS Network Monitoring Solution
